What we offer

Individual Support

Down Syndrome Education Support Service (ESS) is a classroom based support service for teachers providing practical assistance and resources, improving learning outcomes for students with Down syndrome and their classmates.

Collaboration

The approach taken is always collaborative; the teacher is the expert in the individual classroom, whereas Down Syndrome Victoria has extensive expertise supporting students with Down syndrome. Although no two students with Down syndrome are alike, there are a range of teaching strategies and resources which have proven successful in meeting specific needs.

The ESS consultant works alongside the teacher to identify the resources and strategies that will best suit the particular needs of their student, the teaching style of the teacher, and the culture of the classroom.

Inclusion

Many teachers may feel apprehensive or overwhelmed when faced with catering for a child with Down syndrome in their classroom. However, most teachers later report that addressing the learning needs of the student with Down syndrome proved to be less daunting than they had expected by making reasonable adjustments, and that in doing so other children in the classroom also benefited.

Best Practice

International research consistently demonstrates that the strategies developed and implemented to assist students with additional needs benefit a broad range of learners in the classroom.

Equity

Down Syndrome Victoria is a community association made up of people with Down syndrome, their families and supporters. Down Syndrome Victoria has made the Down Syndrome Education Support Service accessible to all Victorian schools by assigning a standard state-wide subscription fee. The service receives ongoing government funding from the Department of Education and Training for students in transitions years.

Down Syndrome Victoria offers a range of additional education services including:

- Workshops for parents
- Individual consultancy
- Transition programs
- Professional development & training
